12 inch 300mm Industrial Ventilation Axial Fan with 5m Flexible Duct

The 12 inch (300mm) Industrial Ventilation Axial Fan with 5m Flexible Duct (model: SHT-30) is a heavy-duty, high-velocity blower designed for efficient air extraction and ventilation. This portable industrial fan is ideal for workshops, welding booths, factories, laboratories, and roof spaces. Its robust welded steel construction and anti-vibration rubber feet ensure stability and durability. The included 5m PVC ducting, made of tough vinyl material with a toughened ring, is flame-retardant and easily connectable to the extraction side fan lip. The ducts are easily retractable and designed to handle large volumes of air at relatively low pressure.

Key Features:

- High-Performance Ventilation: 300mm (12 inch) fan diameter with a maximum speed of 2800 rpm, delivering up to 1500 m³/h of air.
- Robust Construction: Durable welded steel frame with a balanced carrying handle for easy transport.
- Flexible Ducting: 5m PVC ducting, 300mm (12 inch) diameter, flame-retardant and expandable, for versatile ventilation.
- User-Friendly Design: Anti-vibration rubber feet, guarded on/off switch, and the ability to connect multiple hoses for extended reach.
- Portable: Lightweight design with a compact package size for easy storage when not in use.

Specifications:

Product: Blower fan + 5m PVC ducting

Fan Diameter: 300mm (12 inch)

Fan Speed (Max): 2800 rpm

Max Air Delivery: 1500 m³/h

Static Pressure: 370 Pa

Noise Level: 65 dBA

Voltage: 220 V

Power: 520 W

Package Size: 42 x 38 x 40 cm

Gross Weight: 15 kg

Flexible PVC Ducting: 300mm (12 inch) diameter, 5m length (16.41 ft)

Package Content:

- 1 x Industrial Blower Fan (SHT-30)
- 1 x 5m PVC Ducting
