

Cadweld Mould XACY6Y2 (95 x 35 mm)

Product Specifications

The Cadweld Mould XACY6Y2 (95 x 35 mm) is a premium-quality welding mold designed for exothermic welding applications, providing reliable and permanent electrical connections. This product is ideal for bonding conductors in critical industrial environments, ensuring durability and ease of use in various applications. It offers a secure, corrosion-resistant bond that meets the needs of grounding and bonding in a range of settings.

Key Features:

- High-performance exothermic welding mold for superior electrical bonding.
- Durable and long-lasting design ensuring extended service life.
- Provides corrosion-resistant and permanent electrical connections.
- Easy to handle and use in various applications, enhancing efficiency.

Technical Specifications:

- Model: XACY6Y2
- Dimensions: 95 x 35 mm
- EAN: 8711893101928
- Material: High-grade conductive materials for superior performance.

Applications:

The Cadweld Mould XACY6Y2 is commonly used in:

- Electrical grounding systems
- Bonding applications

- Cathodic protection systems

Suitable for industries such as power utilities, telecommunications, and industrial installations requiring robust, permanent electrical connections.

Supplier Information:

Lystus Technical is the trusted supplier, distributor, and importer of the Cadweld Mould XACY6Y2 in Nigeria. For inquiries or orders, please contact:
